This page intentionally left blank.

important article, as we believe it has probably been overlooked by many neuropterists, owing to its having appeared in a comparatively little-known journal and to the very brief manner in which it is mentioned in the 'Zoological Record.'

We are sure that all agricultural entomologists and others interested in galls will find Dr. Houard's work of the greatest value, and we hope it may soon be completed.

W. F. K.

MISCELLANEOUS.

Generic Names of Polychæt Worms that have been preoccupied and remain unreplaced. By ROBERT T. LEIPER, M.B., F.Z.S., Helminthologist to the London School of Tropical Medicine.
